

List 2025 of approved swimsuits CMAS – V4

Update November 28th, 2025

Remind.

1. Order swimsuits only from the companies and contacts listed in this document to ensure they are CMAS-certified. All swimsuits must have QR codes; those without are considered unverified and counterfeit, even if they display the CMAS logo.
2. After receiving the QR Code, it's necessary to flash it to enter the personal data into the CMAS system.

ARENA FOR CMAS

Shop online: (www.arenafinswim.com - info@arenafinswim.com)

POWERSKIN ST NEXT Open Back for Women NEW FROM 2025

Composition Textile: 71% poliammide 29% elastane (Eco Textile 65%of poliamminde is Recycled)

Textile swimsuit Be careful white square back on swimsuit must be only with CMAS logo

POWERSKIN ST NEXT JAMMER for MEN NEW FROM 2025

Composition Textile: 71% poliammide 29% elastane (Eco Textile 65%of poliammide is Recycled)

SWIMSUIT MODEL: Carbon Wave NEW FROM 2022

For Men

For Women open and closed back

Composition Textile: 65% Polyamide (PA), 33% Elastane (EA), 2% Carbon Fiber

SWIMSUIT MODEL: Powerskin R-evo & for Men

Composition Textile: 65% Polyamide (PA), 35% Elastane (EA). Colours: Black & Red, Bishamon, Blue Ocean.

SWIMSUIT MODEL: Powerskin R-evo & for Women open back or closed back

Composition Textile: 65% Polyamide (PA), 35% Elastane (EA). Colours: Black & Red, Bishamon, Blue Ocean.

SWIMSUIT MODEL: Powerskin R-evo & Pants

Composition Textile: 65% Polyamide (PA), 35% Elastane (EA). Colours: Black & Red, Blue Ocean.

SWIMSUIT MODEL: Powerskin Carbon Pro for Women

Composition Textile:
Outer Shell: 52% Nylon, 47% Elastane, 1% Carbon. Inside Lining: 65% Nylon, 34% Elastane, 1% Carbon.
Colours: Blue, Green, Red, Dark Grey. Open/Closed Back.

SWIMSUIT MODEL: Powerskin Carbon Jammer

Composition Textile:

Outer Shell: 52% Nylon, 47% Elastane, 1% Carbon. Inside Lining: 65% Nylon, 34% Elastane, 1% Carbon.

Colours: Blue, Green, Red, Dark Grey.

SWIMSUIT MODEL: Powerskin Carbon Air

Composition Textile:

Outer Shell: 52% Nylon, 47% Elastane, 1% Carbon. Inside Lining: 65% Nylon, 34% Elastane, 1% Carbon.

Colours: Plum, Fuchsia, Electric Blue, Dark Green

SWIMSUIT MODEL: Powerskin R-evolution Closed back for Men and Women

Composition Textile: 80% Polyamide (PA), 20% Elastane (EA).

“

**OUR AIM IS JUST
TO ENHANCE
THE AMAZING
THINGS YOUR
BODY CAN.
ALREADY DO.**

TEXTILE TECHNOLOGY

Jaked uses Smart fabrics, exclusive fabrics which represent the cutting-edge in textiles applied to sport. For each competition swimsuit the R&D Department at Jaked develops a different product in the laboratory. Based on the most advanced nanotechnologies it designs a different architecture of the garment. To conclude, the swimsuit is enriched by finishes that make the most of the kinetics of surfaces to boost performance.

TECNOLOGIA DEI TESSUTI

Jaked impiega Smart fabrics, tessuti esclusivi che rappresentano l'avanguardia del tessile applicato allo sport. Per ogni costume da competizione il Dipartimento R&D di Jaked sviluppa in laboratorio un prodotto diverso – basato sulle più avanzate nanotecnologie – progetta una diversa architettura del capo, e infine lo arricchisce con finissaggi che sfruttano al meglio la cinetica delle superfici per potenziarne le performance.

DNA MADE IN ITALY 

Jaked is an Italian brand: Italian technology and know-how are in its DNA. The entire range of competition swimsuits by Jaked is created, planned and produced entirely in Italy, with materials and assembly techniques focused on the most advanced tradition.

MADE IN ITALY DNA 

Jaked è un marchio Italiano: nel suo DNA tecnologia e know-how tutti italiani. L'intera gamma di costumi da competizione Jaked è ideata, progettata e prodotta interamente in Italia, con materiali e tecniche di confezionamento all'insegna della più avanzata tradizione.

Jaked introduced the best price/performance ratio entry level swimsuit on the market.

Jaked introduce l'entry level con il miglior rapporto qualità/prezzo del mercato.

4-needle flat seams with ultra-resilient yarns and technical lining for easy wearing; superior comfort and easy wearing.

Cuciture piatte a 4 aghi con filati ultra resistenti e fodera tecnica per un facile indosso; una comodità superiore ed un facile indosso.

AQUAsuAQUA2.0: Exclusive treatment, using hydrophobic fluorocarbon resin.

Trattamento esclusivo a base di resina fluorocarbonica idrodispersiva.

The ultra-flat seam made with 4 needles allows a drastic reduction of the seam's thickness, for the athlete's greater comfort.

La cucitura ultra-piatta realizzata a 4 aghi consente una drastica riduzione dello spessore della cucitura, per un maggiore comfort dell'atleta.

KEY FACTOR

The technical lining allows an excellent fit, with the best quality/price ratio.

La fodera tecnica permette un'ottima vestibilità, con il miglior rapporto qualità/prezzo.

Redefined construction and heat welded tapes with increased mechanical capacity.

Costruzione ridefinita e nastri termosaldati con maggiore capacità meccanica.

New generation of 100% two-way stretch fabric, that guarantee greater comfort, even during the toughest training sessions.

Nuova generazione di tessuto 100% elasticizzato bidirezionale, che garantisce un maggiore comfort anche durante le sessioni di allenamento più dure.

Lightweight & iridescent fabric(145 g/m³): each different colour dazzles with shine on contact with the water.

Tessuto leggero e iridescente (145 g/m³): ogni colore risplende con la sua lucentezza, a contatto con l'acqua.

Exclusive "AQUAsuAQUA" hydrophobic finishing treatment developed by J-Lab, the Jaked Research & Development department.

Esclusivo trattamento di finitura idrofobico "ACQUAsuACQUA" sviluppato da J-Lab, il dipartimento di ricerca e sviluppo di Jaked.

Custom print: possibility to realize a custom print dedicated, after verification of feasibility on minimum quantities of production.

Custom print: possibilità di realizzare una stampa personalizzata dedicata, dopo verifica di fattibilità su quantitativi minimi di produzione.

KEY FACTOR

New wider shoulders strap system, with an improved ergonomic design and a brand new cuts on back, that improve wearability and performance in water.

Nuova generazione di tessuto 100% elasticizzato a due vie con un design ergonomico migliorato, che migliora la vestibilità e le prestazioni in acqua.

Structure and cut of the costume specially designed for competitions.

Struttura e taglio del costume appositamente progettato per le competizioni.

High-end swimsuit, comfortable and adaptable with unique fabric features.

Costume di fascia alta, comodo ed adattabile con delle caratteristiche del tessuto uniche.

Material: Jaked exclusive lightweight smart fabric, able to flexibly compress muscles, with innovative technical lining.

Tessuto esclusivo Jaked, smart fabric leggero e capace di comprimere le fibre muscolari con un sistema variabile di forze con un'innovativa fodera tecnica.

Structure: 3D differentiated compression system, with a combination of high and mid compression areas, no sewn seams. High Tenacity polyurethane iridescent welding tape with revolutionary shoulders straps system.

Sistema 3D di compressione differenziata, che alterna zone a media e ad alta compressione, con assenza di cuciture. Nastatura con tape in poliuretano iridescente ad alta tenacità con un rivoluzionario sistema di costruzione delle spalline.

AQUAsuAQUA2.0: The evolution of J-Lab exclusive plasma process, using fluorocarbon resins.

L'evoluzione dell'esclusivo processo al plasma di J-Lab, che utilizza resine al fluorocarbonio.

KEY FACTOR

The combination of different compression levels makes the fabric look striped and results in a system of flexible forces able to improve blood circulation, muscle tissue oxygenation and body position in water.

L'alternanza di compressioni differenti, visibili nella struttura a strisce del tessuto, produce un sistema variabile di forze che migliora la circolazione sanguigna, l'ossigenazione dei tessuti muscolari e l'assetto in acqua.

The J-LABS-HT-S[®], FABRICS is a revolutionary intelligent fabric: made with a nylon microfiber with shape memory associated with an elastomer component offers a feeling comparable to silk. The innovation of this fabric consists in maintaining over time a memory of shape, which allows the swimsuit, after being worn, to have a perfect recovery of shape, thanks to body heat. This elasticity is constant in both directions, it is a regular form, it is called square elasticity. The limit of short or long races is thus reduced: J-Krono is perfect for both.

J-LAB S-HT-S[®] FABRICS è un tessuto intelligente rivoluzionario: realizzato con una microfibra di nylon a memoria di forma associata ad una componente elastomera offre un feeling paragonabile alla seta. L'innovazione di questo tessuto consiste nel mantenere nel tempo una memoria di forma, che consente al costume, dopo essere stato indossato, di avere un perfetto recupero di forma, grazie al calore corporeo. Questa elasticità è costante in entrambe direzioni, è un modulo regolare, si parla di elasticità quadrata. Si abbatte così il limite delle gare brevi o lunghe: J-Krono è perfetto per entrambe.

Its design introduces radical innovations in design and comfort. There is no longer an internal lining, but there are two technical fabrics: performance layer - first outer layer - and contact layer - second inner layer. The swimsuit thanks to its X-shaped construction is adherent to the skin and firm on the body, ensuring a sublime fit. In the women's version the upper body is highly supportive. In the men's version, the back crosscut glues the swimsuit to the athlete's lumbar.

La sua progettazione introduce innovazioni radicali nel design e nel comfort. Non è più presente una fodera interna, ma si parla di due tessuti tecnici: performance layer - primo strato esterno - e contact layer - secondo strato interno. Il costume grazie alla sua costruzione ad X è aderente alla pelle e fermo sul corpo, garantendo una vestibilità sublime. Nella versione donna l'upper body è altamente supportivo. Nella versione uomo il taglio trasversale posteriore incolla il costume alla lombare dell'atleta.

KEY FACTOR

DD-WR S[®] is a water repellency treatment that is part of the eco-friendly finishing family, thanks to the intrinsic water repellency of the fabric. In water, the effect of air bubbles is no longer visible, ensuring even less friction and maximizing hydrodynamics.

DD-WR S[®] è un trattamento di idrorepellenza che rientra nella famiglia dei finishing eco compatibili, grazie all'idrorepellenza intrinseca del tessuto. In acqua, non è più visibile l'effetto delle bollicine d'aria, garantendo ancora meno attrito e massimizzando l'idrodinamicità.
